## DETAILED ACTION

### Status of Claims

1. Claims 9-10 and 16-28 remain for examination.

#### ***Claim Rejections - 35 USC § 112***

2. The 35 U.S.C. 112 of claim 9 ("by a power supply") has been withdrawn due to Applicant's amendment submitted 2 March 2007.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9, 10 and 16-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uzoh et al. (US Patent 5,807,165).
5. Uzoh et al. is applied to the claims for the same reasons as stated in paragraph(s) 9-15 of the previous office action.
6. In regards to claim 9 amendment of "said segmented anode being partitioned into small components that may be adjusted separately," Uzoh et al. discloses small components of a segmented anode (Fig. 10, multiple 67). Furthermore, each small component is capable of being adjusted separately by a spring mechanical bias (col. 5, line 66 to col. 6, line 10) and therefore meets the claim limitation.

***Response to Arguments***

7. Applicant's arguments filed 2 March 2007 have been fully considered but they are not persuasive. In regards to Applicant's argument that Uzoh et al. does not all teach elements relating to the segment anode, please see reasons stated above and in paragraph 12 of the previous office action. In regards to Applicant's argument that the modification of the location of the segment anode is unobvious, Applicant only presents a conclusion statement (remarks, p. 8, 2 March 2007) and thus does not overcome the rejection.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas A. Smith whose telephone number is (571)-272-8760. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571)-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
